Subject NT-001 meeting apology and member's update [SEC=UNC]

UNCLASSIFIED

Dear Celine,

I'm afraid that I will not be able to make tomorrow's NT-001 meeting. For the members update agenda item, please pass on:

- NICNAS has foreshadowed administrative changes to the New Chemicals Program (for notice, go to: http://nicnas.gov.au/Publications/Chemical_Gazette/pdf/2010nov_whole.pdf#page=8) and is currently preparing further guidance for industry.
- Continuing technical work, including compiling toxicity information from published literature on six nanomaterials of interest to NICNAS - TiO₂, ZnO, CeO₂, nanosilver, CNTs and fullerenes.
- Preparing to publishing submissions from previous consultation on website shortly, along with NICNAS responses to stakeholder comments. (This was also my action under action item 9 from the previous meeting but it will have to be carried over, I will send links to members when available between NT-001 meetings)
