My Comments on your NICNAS report on Multiple Chemical Sensitivity (MCS)

Thank you for revising the report on Multiple Chemical Sensitivity (MCS). However, it is still not adequate, still too much backward. For your information, besides Germany, Austria has Officially adopted the same International Classification of Disease (ICD) as Germany for Multiple Chemical Sensitivity (MCS) as a 100% PHYSICAL disease! This must be put in the report!

Please read my article in the Press " Multiple Chemical Sensitivity (MCS) recognized as a physical disease by austrian Government"

Additionally , Japan has recognized Multiple Chemical Sensitivity as a medical condition in its Medical Information System Development. Please, read my article in the Press "Japan officially recognizes Multiple Chemical Sensitivity (MCS):

The majority of Governors in the US have signed proclamations of Multiple Chemical Sensitivity (MCS)/Toxic Injury, Awareness Month. All the proclamations have been reviewed and approved by the Department of Health, Surgeon General, of respective States prior to being signed by Governors.

All proclamations can be viewed at:

Review on Multiple Chemical Sensitivity by Dr. Martin Pall, has been published in the prestigious 3rd edition of " General Applied Toxicology". Please read my article in the press:
