Subject: Nanomaterials Questionnaire [No Protective Marking]
t

DOCUMENT NOT YET CLASSIFIED

Name: Chris Lemm

Organisation:

Email:

Is this Confidential:

Confidential Information:

Question 1:

Question 2:

Limiting access will limit the amount of the chemical being used thus people being exposed

Question 3:

I feel that it wouldn't work

Question 4:

All use of these chemicals for what ever reason should be reportable. When is R & D R &D or start up of production runs??

Question 5:

I feel that all chemicals new and existing should be reportable, without question.

Question 6:

The system should be flexable enough to cope with today's, tomorrows, and in five years time

Question 7:

I feel that all chemicals in this catagory should be treated the same, and therefore all reporting should be the the same, not once off for some, and something else because we can say it's "R & D"

Question 8:

I think the public want to know that their health is being looked after and companys are not just getting a rubber stamp permit

Question 9:

can't remember

Question 10:

To know who is producing, importing, using these chemicals to make into another product. It will help if there are any problems, and maybe in the future set parameters for the strenght etc of the chemicals being made,used.

Question 11:

Not sure, people not coming forward and reporting as they should. all that type of thing, you know.

Question 12:

I think it should be available to anyone who wants to find it

Question 13:

I am or represent: Individual

If Business, Num of Employees:

If Other:
