1 ASSESSMENT AND PRIORITISATION OF EXISTING CHEMICALS ON THE AUSTRALIAN INVENTORY OF CHEMICAL SUBSTANCES (AICS)–STAGE ONE

NICNAS is implementing a new framework for the assessment and prioritisation of previously unassessed chemicals that are listed on the Australian Inventory of Chemical Substances (AICS). The Inventory Multi-tiered Assessment and Prioritisation (IMAP) Framework is being implemented in stages, with a focus on a subset of chemicals on AICS meeting characteristics confirmed through stakeholder consultation. This new framework is producing information about the hazards and risks associated with the use of industrial chemicals and identifies chemicals which may require risk mitigation to ensure safe use.

In July 2012, NICNAS started assessing around 3,000 existing chemicals (Stage One chemicals) using the IMAP Framework, and has published the first, second and third tranches of assessment reports for public comment. The public comment period for the third tranche of assessments ends at close of business on 28 June 2013.

The fourth and final tranche of assessments for the first year of implementation (2012-2013) will be published during the week beginning 24 June 2013. Interested parties have an opportunity to comment on the draft IMAP assessment reports within six weeks of their initial publication. Comments should be provided using the IMAP public comment form, which provides guidance regarding submissions.

To gain further efficiencies in the implementation of IMAP, NICNAS is including additional chemicals for assessment during Stage One. These are chemicals that can be rapidly assessed for either (or both) human health and environmental risks because they are included in a group of chemicals already being assessed in Stage One. A list of these chemicals was published on the 16th of May 2013. This list has now been updated.

For further information on the IMAP Framework, please visit the NICNAS website or contact the Existing Chemicals Program at:

NICNAS
GPO Box 58
Sydney NSW 2001

2 CONTINUATION OF CONDITIONS OF USE ON AICS LISTED LEAD COMPOUNDS USED IN INDUSTRIAL SURFACE COATINGS & INKS

In line with the government's best practice regulation process NICNAS has conducted a [Post Implementation Review \(PIR\)](#) into the impacts of the 2007 annotation of the Australian Inventory of Chemical Substances (AICS) of certain lead compounds used in industrial surface coatings and inks with conditions of use. As a result of the findings of the PIR, the Director of NICNAS has decided to maintain the restrictions imposed by the annotations.

The compounds affected are listed in the table below, and the annotation is the same for all the compounds.

Chemical Name	CAS Number
Lead monoxide	1317-36-8
Lead chromate	7758-97-6
Lead sulfate	7446-14-2
Lead molybdate	10190-55-3
Lead sulfo-chromate	1344-37-2
Lead chromate molybdate sulfate red	12656-85-8
Lead chromate oxide	18454-12-1
Lead octanoate	7319-86-0
Lead 2-ethylhexanoate	301-08-6
Lead oxide	1314-41-6
Lead nitrate	10099-74-8
Lead naphthenate	61790-14-5
Lead peroxide	1309-60-0
Lead carbonate (white lead)	1319-46-6
Lead chrome 1244	unknown

Text of annotations

In order to facilitate continued compliance by introducers of these compounds, the conditions of use have been edited to make them more easily understandable. The annotations have been edited to reframe the exceptions to the restrictions which ceased on 31 December 2008. Those exceptions, which were originally applied to allow sectors time to comply with the requirements of the annotations, are now presented as historical notes. These editorial changes do not result in new regulation nor change the current regulatory burden (OBPR Ref 15035).

Original annotation (greyed sections that have now been reframed as historic notes)

The importation and manufacture of this chemical is subject to the following conditions of use under section 13 of the Industrial Chemicals (Notification and Assessment) Act 1989.

1. *This chemical must not be imported or manufactured for use in any industrial surface coating or as a component of industrial surface coatings at concentrations greater than 0.1%*, EXCEPT for use in industrial surface coatings or in any components of industrial surface coatings for the following industrial applications:*

- a. *Auto refinish car collision repairs;*
- b. *Commercial vehicle and component building;*
- c. *Commercial vehicle refurbishing and repairs;*
- d. *Aviation building (heavy, general and light); and*
- e. *Aviation refurbishing and repairs.*

2. *This chemical must not be imported or manufactured for use in any ink or as a component of inks at concentrations greater than 0.1%*, when intended for industrial uses.*

3. **From 1 January 2009**, this chemical must not be imported or manufactured for use in any industrial surface coating or as a component of industrial surface coatings at concentrations greater than 0.1%*.

*calculated on the non-volatile component of the surface coating or ink.

The chemical is deemed to be a new industrial chemical under the definition given in section 5 of the Industrial Chemicals (Notification and Assessment) Act 1989 if the proposed use does not meet the above conditions.

Clarified annotation (historic notes highlighted in grey)

The importation and manufacture of this chemical is subject to the following conditions of use under section 13 of the Industrial Chemicals (Notification and Assessment) Act 1989.

1. This chemical must not be imported or manufactured for use in any industrial surface coating or as a component of industrial surface coatings at concentrations greater than 0.1%*.
2. This chemical must not be imported or manufactured for use in any ink or as a component of inks at concentrations greater than 0.1%*, when intended for industrial uses.

*calculated on the non-volatile component of the surface coating or ink.

The chemical is deemed to be a new industrial chemical under the definition given in section 5 of the Industrial Chemicals (Notification and Assessment) Act 1989 if the proposed use does not meet the above conditions.

Note:

1. The conditions on industrial surface coatings were commenced on 1 Jan 2007 for all applications, with the exception of certain applications where businesses were allowed two years to 31 Dec 2008 to develop alternative chemicals-all users then needed to comply with the conditions on industrial surface coatings from 1 Jan 2009. The exceptions were:

- a. Auto refinish car collision repairs;
- b. Commercial vehicle and component building;
- c. Commercial vehicle refurbishing and repairs;
- d. Aviation building (heavy, general and light); and
- e. Aviation refurbishing and repairs.

2. The conditions on inks intended for industrial uses were commenced without exceptions on 1 January 2007.

For further information on these clarifications, contact info@nicnas.gov.au.

3 NOTICE 1 OF AMENDMENTS TO THE AUSTRALIAN INVENTORY OF CHEMICAL SUBSTANCES

Notice is given in accordance with section 20 of the *Industrial Chemicals (Notification and Assessment) Act 1989* (the Act) that the Director intends to amend the Australian Inventory of Chemical Substances (AICS) as indicated in the tables below.

Based on evidence from the original nominators, ketone, methyl 2,6,10-trimethyl-2,5,9-cyclododecatrien-1-yl, (CAS RN 28371-99-5) was incorrectly nominated during the AICS compilation phase. NICNAS agrees with the evidence provided by the manufacturer that the name of the chemical that was nominated should have been acetic acid, anhydride, reaction products with 1,5,10-trimethyl-1,5,9-cyclododecatriene (CAS RN 144020-22-4).

The Director has therefore added acetic acid, anhydride, reaction products with 1,5,10-trimethyl-1,5,9-cyclododecatriene (CAS RN 144020-22-4) to the AICS, and intends to delete

Table Chemical added to the AICS

CHEMICAL NAME	MOLECULAR FORMULA	CAS NUMBER
Acetic acid, anhydride, reaction products with 1,5,10-trimethyl-1,5,9-cyclododecatriene	Unspecified	144020-22-4

ketone, methyl 2,6,10-trimethyl-2,5,9-cyclododecatrien-1-yl, (CAS RN 28371-99-5) from the AICS, subject to the requirements indicated under Section 20AA of the Act, set out below.

Table Chemical to be removed from the AICS

CHEMICAL NAME	MOLECULAR FORMULA	CAS NUMBER
Ketone, methyl 2,6,10-trimethyl-2,5,9-cyclododecatrien-1-yl	C ₁₇ H ₂₆ O	28371-99-5

Under Section 20AA of the Act (Chemicals wrongly included in the Inventory) a person may give a written statement to the Director with 3 months of this notice giving reason why the chemical should not be removed. Section 20AA of the Act states that,

- (4) *If the Director receives a statement from a person giving reasons why the chemical should not be removed, the Director must reconsider the proposed removal in the light of the statement.*
- (5) *If the Director accepts the reasons why the chemical should not be removed, the Director must:*
 - (a) *leave the chemical, and any particulars in respect of the chemical, in the Inventory; and*
 - (b) *publish a notice in the Chemical Gazette that the chemical is not going to be removed; and*
 - (c) *give a copy of the notice to the person who gave the statement.*
- (6) *If the Director rejects the reasons why the chemical should not be removed, the Director must:*
 - (a) *give the person who made the statement notice of the decision to reject the reasons; but*
 - (b) *not remove the chemical, or any particulars in respect of the chemical, until 28 days after the date of the giving of the notice or, if the person applies to the Tribunal for review of the decision, until the review has been finalised.*

4 NOTICE 2 OF AMENDMENTS TO THE AUSTRALIAN INVENTORY OF CHEMICAL SUBSTANCES

Notice is given in accordance with section 20 of the *Industrial Chemicals (Notification and Assessment) Act 1989* (the Act) that the Director has amended the Australian Inventory of Chemical Substances (AICS) as indicated below.

The AICS entry for CAS RN 147732-56-7 incorrectly stated that the maximum permissible concentration for this chemical in products was 0.0005%. The error was due to a transcription error. The correct value for this figure is 0.002%. The AICS record for this chemical has now been amended as shown below.

CAS No:	147732-56-7
Chemical Name:	L-Lysine, N-(1-oxohexadecyl)glycyl-L-histidyl-
Molecular Formula:	C30H54N6O5
Assessed by NICNAS:	No
Associated Names:	Palmitoyl oligopeptide

IMPORTANT INFORMATION ABOUT THIS CHEMICAL.

This chemical has been included in the Australian Inventory of Chemical Substances (AICS) under Subsections 15AA(1) and 15AA(2) of the *Industrial Chemicals (Notification and Assessment) Act 1989*, which enable the transfer of a chemical previously regulated by another Commonwealth regulator or a chemical that is in a product that was previously regulated by another Commonwealth regulator, and for which there is no current assessment certificate, and which is currently in use in Australia.

Deleted Conditions of Use

Condition of Use

The importation and manufacture of this chemical is subject to the following conditions of use included on this Inventory record under section 15AB(1) of the *Industrial Chemicals (Notification and Assessment) Act 1989*.

- For cosmetic use only.
- For dermal use only.
- The concentration is not to exceed 0.0005%.
- It is not intended for use in the eye.

The chemical is deemed to be a new industrial chemical under the definition given in section 5 of the Industrial Chemicals (Notification and Assessment) Act 1989 if the proposed use does not meet the above condition.

For further information contact info@nicnas.gov.au

Corrected Conditions of Use

Condition of Use

The importation and manufacture of this chemical is subject to the following conditions of use included on this Inventory record under section 15AB(1) of the *Industrial Chemicals (Notification and Assessment) Act 1989*.

- For cosmetic use only.
- For dermal use only.
- The concentration is not to exceed 0.002%.
- It is not intended for use in the eye.

The chemical is deemed to be a new industrial chemical under the definition given in section 5 of the *Industrial Chemicals (Notification and Assessment) Act 1989* if the proposed use does not meet the above condition.

For further information contact info@nicnas.gov.au

5 NEW CHEMICALS FULL PUBLIC REPORTS

Reference number	Applicant	Chemical or trade name	Hazardous substance	Introduction volume (per annum)	Use
LTD/1603	Chromaflo Technologies Australia Pty Ltd	Polymer in Chroma-Chem Coatings	ND	≤100 tonnes per annum	Component of marine and industrial coatings
LTD/1653	Kao Australia Pty Ltd	Polymer PE-PC	ND	< 10 tonnes per annum	A component of hair styling products
STD/1446	Oce-Australia Ltd	Chemical in Toner Pearls	No	≤ 10000 tonnes per annum	Component of Ink
STD/1462	Albemarle Singapore Pte Ltd	XP-7866	No	≤ 100 tonnes per annum	Flame retardant in plastics
PLC/1109	Evonik Australia Pty Ltd	LA-D 1420	No	< 30 tonnes per annum	Component of paints
PLC/1122	Ricoh Australia Pty Ltd	Polymer in SU-U1244	No	≤500 tonnes per annum	Component of inkjet printer ink
PLC/1128	DuluxGroup (Australia) Pty Ltd	Polymer 12 in AUTOSPEED PAINT	No	< 10 tonnes per annum	A component of automotive paints
PLC/1129	DuluxGroup (Australia) Pty Ltd	Polymer 13 in AUTOSPEED PAINT	No	< 10 tonnes per annum	A component of automotive paints
PLC/1133	Woolworths Limited	Polymer in Minwax Wood Finish & Minwax Polyshades	No	≤5 tonnes per annum	Component of furniture stains and varnishes
EX/182	MTI Group Australia Pty Ltd	1-Propene, 1,3,3,3-tetrafluoro-, (1E)-	No	≤ 200 tonnes per annum	Propellant for aerosols used in mining applications

ND: Based on the information available, the notified chemical cannot be classified according to the *Globally Harmonised System for the Classification and Labelling of Chemicals* (GHS), as adopted for industrial chemicals in Australia, or the *Approved Criteria for Classifying Hazardous Substances* [NOHSC: 1008(2004)]

***Select link to view Full Public Report from the NICNAS website**

6 ACCESS TO FULL PUBLIC REPORT

NICNAS publishes a Full Public Report for each new chemical assessed. These reports are available for inspection at our NICNAS office by appointment only at Level 7, 260 Elizabeth St SURRY HILLS NSW 2010.

Reports can also be viewed and downloaded free of charge from our website at <http://www.nicnas.gov.au/>. Copies of these reports may also be requested, free of charge, by contacting the Administration Section of NICNAS by phone: (02) 8577 8800 or fax: (02) 8577 8888.

7 EARLY INTRODUCTION PERMITS FOR NON-HAZARDOUS INDUSTRIAL CHEMICALS

The permits listed in Table 3 were issued to import or manufacture the following chemicals prior to the issue of their respective assessment certificates under section 30A of the Act.

Table 3

Early Introduction Permits

PERMIT NUMBER	COMPANY NAME	CHEMICAL OR TRADE NAME	USE
914	Evonik Australia Pty Ltd	Polymer in VISCOPLEX 14/6870	Additive for fuel oils and lubricants
915	Evonik Australia Pty Ltd	Polymer in VISCOPLEX 14/6871	Additive for fuel oils and lubricants
902	Valspar Paint (Australia) Pty Ltd	Polymer in Colours & Chemicals 431-724	Component of industrial paints
909	Cubic Pacific Pty Ltd	Alkyd Resin	Ingredient in ink/paint products for automotive decoration
916	Rhodia Chemicals Pty Ltd	Colloid 1284	A component of paint
910	Chevron Phillips Chemicals Australia Pty Ltd	Chemical 2 in Soltex Additive	Component of drilling muds for oil and gas well drilling.
911	Chevron Phillips Chemicals Australia Pty Ltd	Chemical 1 in Soltex Potassium Additive	Component of drilling muds for oil and gas well drilling.
912	Chevron Phillips Chemicals Australia Pty Ltd	Chemical 2 in Soltex Potassium Additive	Component of drilling muds for oil and gas well drilling.
913	DuPont (Australia) Pty Ltd	Perfluoinated Polymer in ELN101570-7	Component of leather treatments & stone & tile sealants

8 COMMERCIAL EVALUATION CATEGORY PERMIT

The permits listed in Table 4 were issued to import or manufacture the following chemicals for commercial evaluation under section 21G of the *Industrial Chemicals (Notification and Assessment) Act 1989*.

Table 4
Commercial Evaluation Category Permits

PERMIT NUMBER	COMPANY NAME	COMPANY POSTCODE	CHEMICAL OR TRADE NAME	HAZARDOUS SUBSTANCE	QUANTITY	USE	PERIOD APPROVED
807	Jotun Australia Pty Ltd	3012	Phenol, 4,4'-(1-methylethylidene) bis-, polymer with 2-(chloromethyl)oxirane, reaction products with 5-amino-1,3,3-trimethylcyclohexanemethanamine and 2-methyl-1,5-pentanediamine	Yes	4000	Component of a two-pack epoxy coating for industrial use	2 years

ND: Based on the information available, the notified chemical cannot be classified according to the *Globally Harmonised System for the Classification and Labelling of Chemicals (GHS)*, as adopted for industrial chemicals in Australia, or the *Approved Criteria for Classifying Hazardous Substances* [NOHSC: 1008(2004)]

9 LOW VOLUME CATEGORY PERMITS

The permits listed in Table 5 were issued to import or manufacture the following chemicals under section 21U of the *Industrial Chemicals (Notification and Assessment) Act 1989*. Low Volume Category Permits are approved for 36 months.

Table 5
Low Volume Category Permits

PERMIT NUMBER	COMPANY NAME	COMPANY POSTCODE	CHEMICAL OR TRADE NAME	HAZARDOUS SUBSTANCE	USE
998	BASF Australia Ltd	3006	1,3-Benzenedicarboxylic acid, polymer with 2,2-dimethyl-1,3-propanediol, hexanedioic acid, 1,6-hexanediol, 3-hydroxy-2-(hydroxymethyl)-2-methylpropanoic acid and 5-isocyanato-1-(isocyanatomethyl)-1,3,3-trimethylcyclohexane, compd. with 2-amino-2-methyl-1-propanol	ND	Component of hair sprays
999 (Renewal)	Givaudan Australia Pty Limited	2153	Belambre	Yes	Fragrance ingredient

ND: Based on the information available, the notified chemical cannot be classified according to the *Globally Harmonised System for the Classification and Labelling of Chemicals* (GHS), as adopted for industrial chemicals in Australia, or the *Approved Criteria for Classifying Hazardous Substances* [NOHSC: 1008(2004)]

10 CONTROLLED USE PERMITS

The permits listed in Table 6 were issued to import or manufacture the following chemicals for controlled use under section 22B of the *Industrial Chemicals (Notification and Assessment) Act 1989*.

Table 6
Controlled Use Permit

PERMIT NUMBER	COMPANY NAME	COMPANY POSTCODE	CHEMICAL OR TRADE NAME	HAZARDOUS SUBSTANCE	QUANTITY KG	USE	PERIOD APPROVED MONTHS
20	Ecolab Pty Ltd	2113	Sulfonated Oleic Acid	Yes	10,000	Precursor in manufacture of sanitizing and bleaching agent	36

11 NOTICE OF CHEMICALS ELIGIBLE FOR LISTING ON THE AUSTRALIAN INVENTORY OF CHEMICAL SUBSTANCES FIVE YEARS AFTER ISSUING OF ASSESSMENT CERTIFICATES

Notice is given in accordance with section 14(1) of the *Industrial Chemicals (Notification and Assessment) Act 1989*, that the following chemicals have been added to the Australian Inventory of Chemical Substances.

Table 7

Chemicals Eligible for Listing on the Australian Inventory of Chemical Substances

CHEMICAL NAME	MOLECULAR FORMULA	CAS NUMBER
2-Propenoic acid, 2-methyl-, 2-(dimethylamino)ethyl ester, polymers with Et acrylate, polyethylene glycol methacrylate C16-18-alkyl ethers and polyethylene-polypropylene glycol monoallyl ether	Unspecified	862906-83-0
2-Propenoic acid, 2-methyl-, butyl ester polymer with butyl 2-propenoate, 2-hydroxyethyl 2-methyl-2-propenoate and 2-oxiranylmethyl 2-methyl-2-propenoate	$(C_8H_{14}O_2.C_7H_{12}O_2.C_7H_{10}O_3.C_6H_{10}O_3)_x$	89277-63-4
Asphalt, sulfonated, sodium salt	Unspecified	68201-32-1
Benzenamine, 4,4'-methylenebis[3-chloro-2,6-diethyl-	$C_{21}H_{28}Cl_2N_2$	106246-33-7
Butanedioic acid, 2,3-dihydroxy-, 1,4-bis(2-ethylhexyl) ester	$C_{20}H_{38}O_6$	886584-31-2
Propanoic acid, 3-hydroxy-2-(hydroxymethyl)-2-methyl-, polymer with 2,2'-[9H-fluoren-9-ylidenebis(4,1-phenyleneoxy)]bis[ethanol] and 5-isocyanato-1-(isocyanatomethyl)-1,3,3-trimethylcyclohexane, compd. with N,N-diethylethanamine	$(C_{29}H_{26}O_4.C_{12}H_{18}N_2O_2.C_5H_{10}O_4)_x.X$ $C_6H_{15}N$	911103-27-0
Quino[2,3-b]acridine-7,14-dione, 1,8(1,10 or 3,10)-dichloro-5,12-dihydro-, sulfonated, aluminum salts	Unspecified	862197-37-3

12 NOTICE OF CHEMICALS ELIGIBLE FOR IMMEDIATE LISTING ON THE AUSTRALIAN INVENTORY OF CHEMICAL SUBSTANCES AFTER ISSUING OF ASSESSMENT CERTIFICATES

Notice is given in accordance with section 13B of the *Industrial Chemicals (Notification and Assessment) Act 1989*, that the following chemicals have been added to the Australian Inventory of Chemical Substances.

Table 8

Chemicals Eligible for Immediate Listing on the Australian Inventory of Chemical Substances

CHEMICAL NAME	MOLECULAR FORMULA	CAS NUMBER
1,3-Benzenedimethanamine, polymer with 1,3-diisocyanatomethylbenzene, polyethylene-polypropylene glycol mono-Bu ether-blocked	Unspecified	1428963-34-1
Carbamic acid, N,N'-[1,3-phenylenebis[methyleneiminocarbonylimino(methyl-3,1-phenylene)]]bis-, mixed diesters with 2-[2-(2-butoxyethoxy)ethoxy]ethanol and polyethylene glycol mono-Me ether	Unspecified	1428963-35-2
1,2-Ethanediamine, polymer with aziridine, N-[3-[(2-ethylhexyl)oxy]-3-oxopropyl] derivs., compds. with polyethylene-polypropylene glycol mono-Bu ether phosphate	Unspecified	398475-96-2
Fatty acids, C18-unsatd., dimers, diesters with polyethylene glycol mono-Me ether	Unspecified	1428963-36-3
2-Propenoic acid, 2-methyl-, butyl ester, telomer with butyl 2-propenoate, 2-(dimethylamino)ethyl 2-methyl-2-propenoate, 1,1'-(1,1-dimethyl-3-methylene-1,3-propanediyl)bis[benzene], 2-[2-(2-ethoxyethoxy)ethoxy]ethyl 2-methyl-2-propenoate, 2-ethylhexyl 2-methyl-2-propenoate, 2-ethylhexyl 2-propenoate and methyl 2-methyl-2-propenoate, 2,2'-(1,2-diazenediyl)bis[2-methylbutanenitrile]-initiated	Unspecified	1428963-38-5

2,5-Furandione, telomer with ethenylbenzene and (1-methylethyl)benzene, hydrolyzed, 3-(dimethylamino)propyl imide, imide with polyethylene-polypropylene glycol 2-aminopropyl Me ether, 2-[(C10-16-alkyloxy)methyl]oxirane-quaternized, benzoates (salts)	Unspecified	1428963-39-6
2,5-Furandione, telomer with 1,1'-(1,1-dimethyl-3-methylene-1,3-propanediyl)bis[benzene] and ethenylbenzene, 2,2'-(1,2-diazenediyl)bis[2-methylbutanenitrile]-initiated, hydrolyzed, imide with polyethylene-polypropylene glycol 2-aminopropyl Me ether	Unspecified	1428963-41-0
2-Propenoic acid, 2-ethylhexyl ester, reaction products with 2-phenoxyethanol- and polypropylene glycol mono-Bu ether-blocked diethylenetriamine-1,6-diisocyanatohexane-ethylenimine-2-oxepanone-tetrahydro-2H-pyran-2-one polymer ester with polyethylene glycol mono-Me ether	Unspecified	1428963-42-1
2-Propenoic acid, 2-methyl-, butyl ester, telomer with 2-(dimethylamino)ethyl 2-methyl-2-propenoate, 1,1'-(1,1-dimethyl-3-methylene-1,3-propanediyl)bis[benzene], 2-ethylhexyl 2-methyl-2-propenoate, methyl 2-methyl-2-propenoate and phenylmethyl 2-methyl-2-propenoate	$C_{18}H_{20} \cdot (C_{12}H_{22}O_2 \cdot C_{11}H_{12}O_2 \cdot C_8H_{15}NO_2 \cdot C_8H_{14}O_2 \cdot C_5H_8O_2)_x$	1428869-87-7
1-Propananium, 2,3-dihydroxy-N,N,N-trimethyl-, chloride (1:1)	$C_6H_{16}NO_2 \cdot Cl$	34004-36-9
Linseed oil, polymer with maleic anhydride and pentaerythritol	$(C_5H_{12}O_4 \cdot C_4H_2O_3 \cdot \text{Unspecified})_x$	67922-98-9
Siloxanes and Silicones, di-Me, Me hydrogen, hydrogen-terminated, polymers with Me silsesquioxanes and vinyl group-terminated di-Me siloxanes	Unspecified	1004791-75-6
Siloxanes and Silicones, di-Me, 3-hydroxypropyl Me, ethers with polyethylene glycol mono-Me ether and polypropylene glycol mono-Bu ether	Unspecified	1430224-31-9
